PROFESSIONAL SUMMARY

MCA student with hands-on experience building Python-based full-stack web applications. Built MediSched Global, a healthcare appointment platform using FastAPI and MongoDB with async Motor driver, OTP email authentication, geospatial hospital search, and Render deployment. Also built MaduraiOne, a transit web app with FastAPI backend. Seeking an entry-level Python Developer or Backend Developer role.

TECHNICAL SKILLS

Languages: Python (Primary), JavaScript, Java
Backend: FastAPI, Flask, REST API Design, Async Programming
Frontend: React 19, Vite, Tailwind CSS, HTML5, CSS3
Database: MongoDB (Motor/Atlas), MySQL
Auth & Payments: JWT, OTP Authentication, SMTP Email, Razorpay
Tools: Git, GitHub, VS Code, Render

PROJECTS

MediSched Global — Healthcare Appointment Platform

Stack: Python 3.11, FastAPI, React 19, Vite, MongoDB Atlas (Motor), JWT, SMTP, Render

Live: <https://medisched-frontend.onrender.com>

GitHub: <https://github.com/keerisweety>

- Built a full-stack healthcare platform with separate patient and doctor portals, OTP-based email login, and JWT session management across protected routes.
- Developed a real-time doctor dashboard with 15-second polling for live schedule updates, enabling prescription entry and automated appointment email notifications.
- Implemented distance-based hospital discovery using the Haversine formula and family member profile management for patient accounts.
- Deployed full-stack app to Render with cloud-managed MongoDB Atlas; backend built with FastAPI using async Motor driver.

MaduraiOne — Mobile-First Transit Web App

Stack: FastAPI, React 18, Vite, MongoDB, Tailwind CSS, Razorpay, QRCode

Live: <https://maduraione.onrender.com>

GitHub: <https://github.com/keerisweety/Madurai-one>

- Built a mobile-first travel companion web app for Madurai providing unified access to TNSTC government bus, private bus, auto, car, bike, and train transport options.
- Developed FastAPI backend with OTP phone authentication, MongoDB for persistent data storage, and Razorpay payment gateway integration.
- Implemented TNSTC fare calculation, QR ticket generation using UUID, GPS-based location detection, and Tamil/English bilingual language switching.
- Added accessibility mode for visually impaired users with optimised touch targets and typography.

Personal Portfolio Website

Stack: HTML5, CSS3, JavaScript

Live: <https://keerisweety.github.io/Portfolio/>

GitHub: <https://github.com/keerisweety>

- Built a fully responsive portfolio site showcasing skills, projects, and education with mobile-first design.

- Implemented smooth scroll navigation and clean UI; deployed on GitHub Pages.

EDUCATION

Master of Computer Applications (MCA)

Jul 2024 – May 2026

Madurai Kamaraj University College, Madurai
CGPA: 7.75 / 10

B.Sc. Mathematics

Jul

2021 – May 2024

E.M.G Yadava Womens College, Madurai
CGPA: 7.14 / 10

INTERNSHIP

Full Stack Java Intern — Certified Industrial Internship

Apr 2025 (2 Weeks)

- Developed frontend and backend modules following industry OOP practices and Git-based version control.
- Gained end-to-end exposure to feature development from UI layer to database integration.

CERTIFICATIONS

Full Stack Development MasterClass (30 Days) — Certified Online Training, 2024

HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB — hands-on training building end-to-end web applications with REST API and database integration.
